PROGRAMMING KNOWLEDGE

Languages	Python, SQL, TypeScript, Java, JavaScript, C++
Backend & APIs	FastAPI, Pydantic, SQLAlchemy, REST APIs, Node.js, NestJS, Spring Boot, Spring Security, Hibernate/JPA, JWT
Databases	PostgreSQL, MySQL, SQLite
Data Engineering & Analytics	Databricks, PySpark, pandas, Polars, Azure Data Explorer (ADX/KQL), Elasticsearch
AI & Applied Machine Learning	Azure Cognitive Services, LLM/AI Integration, Agentic AI, NumPy, Whisper, VOSK
Frontend	React, Next.js, Angular, Streamlit, Tailwind CSS
Cloud & DevOps	Azure, AWS, GCP, Docker, Kubernetes, Terraform, Git/GitHub, Linux
Collaboration & Enterprise Tools	Jira, Confluence, Sharepoint, SAP, SCRUM

WORK EXPERIENCE

Data Applications Engineer

Mobile Application Client

Jul 2026 – Present

Remote

React TypeScript Node.js REST APIs PostgreSQL Git

- Designed and developed a mobile-first application using React, TypeScript, and Vite, implementing reusable components, responsive interfaces, and scalable game logic for multiple game modes.
- Built Node.js APIs and a PostgreSQL persistence layer for user accounts, match history, scores, and gameplay analytics.
- Owned the application architecture and domain model, and UI behavior to support future web and mobile releases.

Lead Data & AI Engineer

Event Management Client

Sep 2025 – Jun 2026

Remote

Python Azure Cognitive Services Azure Speech Streamlit Whisper VOSK Deep-Translator REST APIs

- Owned the architecture and delivery of a real-time multilingual translation application using Python and Azure AI services, coordinating requirements and development with project collaborators.
- Built the Python pipeline to process live audio, integrate Azure AI translation services, and deliver translations in near real time.
- Developed the full-stack application and APIs using FastAPI, TypeScript, and React, enabling users to view live translations.

Senior Data Engineer – Automotive Industry

ARRK Engineering GmbH

Dec 2024 – Aug 2025

Munich, Germany

Python Azure ADX KQL Databricks AWS PySpark

- Processed and transformed 1B+ telemetry records using Python, Databricks, PySpark, and PostgreSQL, delivering structured datasets for downstream analysis.
- Built and optimized data pipelines for validation, transformation, and preparation of telemetry data for engineering reports.
- Led the redesign of data models and dashboards, reducing redundant tables and transformations while improving loading times by approximately 30% for more than 15 engineering analysts.

Lead Data Engineer

Retail & eCommerce Client

Dec 2023 – Nov 2024

Remote

Python FastAPI SQL PostgreSQL React TypeScript Java Spring Boot Hibernate Docker Git Azure

- Built data migration and validation workflows to consolidate inventory and product data from multiple operational sources into a relational database.
- Designed the PostgreSQL data model and persistence layer using SQLAlchemy and Pydantic, ensuring reliable relationships and consistent inventory data.
- Built REST APIs and a full-stack inventory platform using FastAPI, TypeScript, React, and JWT, delivering dashboards that reduced the time spent locating product information by approximately 50%.

Enterprise Software Engineer

Planisware Deutschland GmbH

Feb 2022 - Nov 2023

Munich, Germany

Python SQL FastAPI React TypeScript Java Spring Boot Hibernate Azure Docker Git Elastic Search REST APIs

- Owned and led the delivery of enterprise SaaS solutions supporting more than 1,000 users, coordinating requirements and development with client teams.
- Engineered PostgreSQL data models with 1M+ interconnected records and optimized Python data pipelines, reducing processing time from three hours to 10 minutes.
- Built full-stack data applications and operational dashboards with TypeScript, React, and REST APIs connecting external platforms, helping more than 30 users monitor KPIs and system performance.

Digital Analytics Engineer

webalyse GmbH

Jan 2021 - Jan 2022

Munich, Germany

Python SQL PostgreSQL FastAPI React TypeScript GCP Adobe Analytics

- Implemented data pipelines based on Python and PostgreSQL to process high-volume web analytics data collected in Google and Adobe platforms for websites receiving more than 100,000 daily visits.
- Developed full-stack data applications using FastAPI, TypeScript, and React, enabling analytics teams to track KPIs.
- Owned dashboard design and maintenance, and automated reporting workflows that helped more than 20 stakeholders monitor business KPIs.

LANGUAGES

Spanish (Native speaker) | English (Fluent – C1) | German (Fluent – C1)

EDUCATION

Technical University of Munich (TUM) | M.Sc. Environmental Engineering | Fields of Study: Data processing, probabilistic methods and machine learning

Universidad Simón Bolívar | B.Sc. Mechanical Engineering | Fields of Study: Machine dynamics and machine elements
